

Summer Mathematics Pursuit

Summer work is designed to help students stay sharp on their existing skills to allow for a faster acquisition of new skills taught in the following year. The math assignments at Khan academy are for FPD Upper School students (rising 6th-12th). Khan Academy is an online curriculum support for students to review skills. Assignments must be turned in by Monday, August 7, 2023. Student assignments are found on [Khan Academy](#). If you have any pressing issues, please email: Kristen.Kreutner@fpdmacon.org

Will this count as a grade?

Yes, your student will receive a minor assessment grade based on completion and accuracy.

Khan Academy:

Your student's username and password are located in Viking Connect under "Official Notes." Students have already created an account in Khan Academy using their FPD email account.

Assignments on Khan are published and available for students to view. Make sure the assignments being completed are the ones assigned on your "Home" tab. Students are not required to view the course videos; however, FPD strongly recommends students watch the video tutorials if they are not earning 100% on their assignments.

Complete each of the following exercises at Khan Academy with a score of 80%. You have unlimited attempts until Monday, August 7th. Take advantage of the hints and videos provided through the website to prepare yourself for the next year of mathematics. You should see these assignments on your "Home" tab. Do not try to search these assignments out. If they have not been assigned to you, the results will not get to your teacher.

All curriculum has been carefully curated to keep student's skills sharp.

If you have any questions, please contact Kristen Kreutner at Kristen.Kreutner@fpdmacon.org or call 478-477-6505.

GO VIKINGS!
